

## Polarity

The purpose of my commentary is not to be judgmental, but to be in touch with reality, to simply give us a perspective on where we stand in time in terms of the history and cultural norms of our civilization so we can be more discerning, wiser and make better decisions.

Here we go on a subject which is highly media propagandized and emotionally charged (and therefore irrational) for many people. ...

Legally, the US has repudiated polarity in the basic unit of society, the building block of society, the nuclear family, with the Supreme Court's ruling validating homosexual (non-polarity) marriage and benefits. This US Supreme Court ruling is contrary to both a basic tenet of Christianity, where the polarity of the nuclear family (husband + and wife -) is the basic building block of society. This is also contrary to the perspective the Asian cultures hold in their centuries' old yin/yang perspective, and contrary to the heterosexual habits of all free wild animals. The US Supreme Court ruling is also contrary Islamic legal practice. ...

Remembering that theology is what God does, and science is how He does it, flip sides of the same coin, as Einstein said, "*Science without religion is lame. Religion without science is blind.*" The harmonic holographic fractal of health and life on Planet Earth is polarity, from the atom itself with negative electrons and positive protons, ... + - ..., to the electromagnetic basis of the planet itself (north pole, south pole) (spinning magnetosphere whose limitless energy Tesla discerned how to tap, harness and use), to the earth's dramatically weakening magnetic field which negatively affects all life significantly, to the atmosphere's magnetosphere, ionosphere, to lightning which is an electrostatic discharge that equalizes the negative/positive polarization, to the centuries old validity of yin/yang in Asian cultures including acupuncture which French nuclear science has validated, to centuries of healing using the North Pole ("*green*") side of magnets ("*The Magnetic Effect*" by Davis & Rawls), to the vital acid/alkaline (+-) polarity balance of the soil for producing healthy plants, to the critical nature of the sodium/potassium (+-) polarity exchange at our cellular level for good health, to the magnetic polarity at various parts of the human body which result in literally + - attraction when male and female face each other, to the 6 pairs (12) of yin/yang, + - organ systems in our bodies, plus there is the polarization in electricity, computers, etc.

Everything that is alive and healthy has a vibrant + - polarity component.

The harmonic in history is that the acceptance socially and politically of homosexuality has historically marked the end of a civilization, as it has also hailed the death of the nuclear polarized male/female, husband/wife, + - family. There have been numerous secular sociological books written on this subject, on the vital nature of the basic nuclear polarized male/female, husband/wife, family. (These books are presented in the "*Allegiance*" section of "*Christianity*" free on the home page of our website - [www.remcmaster.com](http://www.remcmaster.com)) .

Again, no judgment or condemnation here, just science, history, sociology, philosophy and facts in an open and honest discussion, all effectively saying the same thing. The Lebanese have an age old proverb: "*Truth kills those who hide from it.*" True enough.
